Moves on the Sheet, *Not on the Feet.*

Heelift® Glide Boot —

How will Heelift Glide save you time? It's simple. A boot that stays in place, moves with the patient, and is comfortable will eliminate the need for repeated adjustments and reapplications. A boot that effectively offloads and keeps the patient's heel safe from pressure means less time spent on costly treatments for pressure ulcers. And for those who have an existing pressure ulcer, the effective offloading and comfort mean you can concentrate on healing the wound. Heelift Glide represents a brand new chapter in the Heelift® story.

Of course, Heelift Glide still features the heel offloading that you've come to expect from a Heelift. Just like the original Heelift Suspension Boot, the Heelift Glide is ready to use right out of the bag or can be customized to meet your patient's needs.

We designed the Heelift Glide by incorporating years of feedback from clinicians and patients, making this the best Heelift yet. Find out for yourself.

Indications for Use:

- High Risk Assessment Scale Score
(eg: Braden Scale <16)
- Prior or Current History of Pressure Ulcers
- Prolonged Immobility
(hip fracture, coma, stroke)
- Compromised Circulation
(diabetes, arterio-sclerosis, stroke)
- Neurological Disorder
(paraplegia, diabetes, stroke)
- Advanced Age (>65)

What makes the Heelift® Glide the right boot for your patient?

Because proper fit is crucial to the success of your prevention and treatment program, Heelift Glide is available in three sizes.

- Suspends the heel in space for a pressure-free environment.
- Soft inner material cradles the calf redistributing pressure over a wider area and providing interior grip.
- 40% lighter, cooler and less bulky than a pillow-style boot.
- Fabric covering, tricot backing and innovative stitching ensures there are no rough, hard or sharp edges that can damage sensitive skin.

Calf Circumference
9 in (23 cm) from floor

Heelift Glide **Petite:** 6 - 10 in (15 - 25 cm)
 Heelift Glide **Standard:** 10 - 15 in (25 - 38 cm)
 Heelift Glide **Bariatric:** 15 - 23 in (38 - 58 cm)
